Print, Scan & Fleet
Management Solution

myQ X

MyQ gives you the opportunity to do more with your time.

1. Customised experience

We live in a world of personalization, where quicker, easier and safer are key to creating an improved experience and where proof and justification take a prominent role in any procurement process.

2. To get more done within the same amount of time

In recent years workforce people's expectations and demands have increased, wanting to get more done within the same amount of time, creating additional unnecessary stresses and strains within a business environment.

3. The very latest in print communication technology

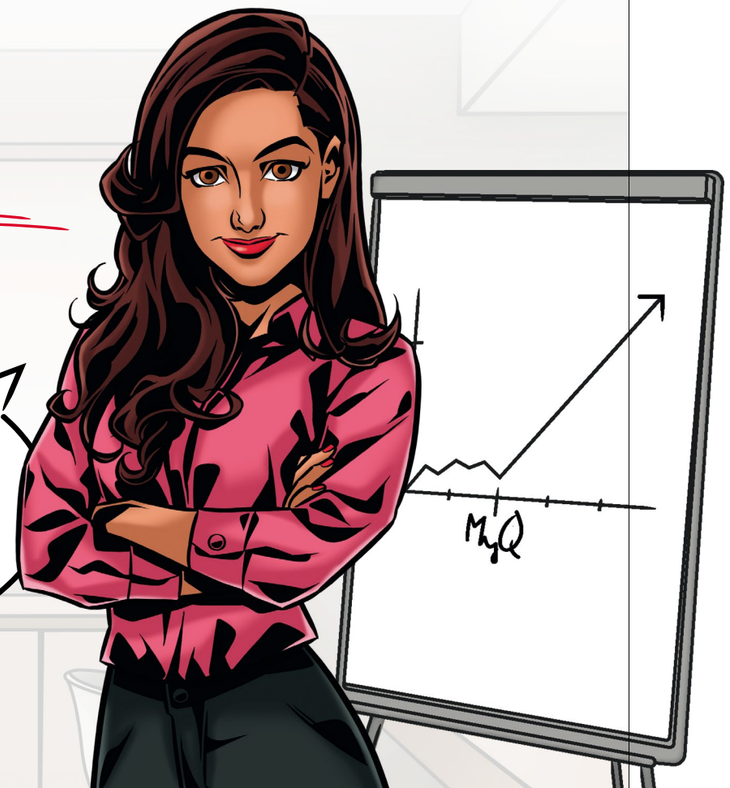
At MyQ, we recognize that time is the most important commodity we have, and have taken that belief through into developing the very latest in print communication technology.

Who will benefit:

- **Managers**
  will appreciate how much time is saved through customized functions.
- **CEOs**
  will love the visibility of a transparent group landscape.
- **CFOs**
  will notice the simplicity of cost monitoring and account reporting.
- **IT teams**
  will see an instant benefit from network stability and speed of information.
- **HR departments**
  will have confidence in user management and security features.
- **Users**
  will be pleased by the ease of use.

MANAGERS

Reduced paperwork, simplified operation, clear rules and accurate reports will **reduce costs, help the environment and save valuable time.**



Increase efficiency.

More restrictions and a vast number of work rules do not necessarily lead to the best performance. That is why our simplified operations reduce paperwork and increase efficiency at the device.

Prevent misuse of sensitive data.

In each company, success is accompanied by higher demand for internal documents. We will always make sure that your confidential production plans, payslips or commercial offers can be accessed by authorised personnel only.

Accelerate the return on investment.

Informed and effective decisions have to be based upon knowing correct information. Before buying printing devices, knowing who prints, what, where and why is imperative. After the purchase, it is necessary to keep the costs within set limits. MyQ will answer all your questions through nearly 100 reports at the right time.

Protect the environment.

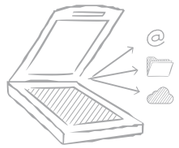
Many will say that “growth, cost reduction and responsibility” are the three main pillars of management. MyQ will support the development of your business, save employees time, reduce errors and prevent wastage through decreased paper consumption and toner wastage.

USERS

We believe there are
more important activities
than standing at a printer.

Get freedom of movement.

It doesn't matter if you are in your own office, your branch office or meeting a colleague. You can comfortably print documents at every printer or multifunctional device from your PC, tablet or mobile phone. It is equally easy to make a copy or send a scan to your mailbox, folder or an electronic archive.



Digitize documents with scanning workflows.

Avoid manual re-typing and endless paper trails. Automate your processes and digitize with ease! After only one click, Easy Scan functions will scan and send your document to your e-mail, folder or cloud storage, e.g. Google Drive, OneDrive or SharePoint.

Secure your documents.

You no longer have to be afraid of someone reading the content of your documents. Before printing your tasks, you will identify yourself by entering a password, using your contactless card or your smartphone.

Complete your tasks.

Murphy's Law applies to everyone, especially when you least need it. If there is something wrong with your copier, the system will alert you before it can affect your work. You can simply go to the next unoccupied device and finish your work there.

IT SPECIALISTS

A good system should give you **everything you need.**

Remove unnecessary administration.

Automation and simplifying tasks are always of benefit. MyQ offers pre-created reports and the ability to create your own, all of which can be scheduled. MyQ can also order consumables, monitor and report on maintenance issues.

Improve your printing environment.

Higher availability of services with a lower number of printing devices – a dream that can finally turn into reality. Pull printing, mobile print or offline cache ensures a print job can be printed on any available device, saving money, time and effort.

Reduce operating expenses.

Rules and quotas will help you to keep print volumes under control. And private printouts? It's up to you, if you eliminate them all, or you "sell" them to employees as part of a corporate benefits package, together with your HR.

Simplify deployment and maintenance.

Installation and setup of a new device within a few minutes, automatic search, remote installation and setup of printing devices has never been so easy. Thanks to our flexible licensing you can constantly respond to the changing requirements.
